Height: 24 inches

Spread: 24 inches

Sunlight: ○ ◐ ●

Hardiness Zone: 5b

Other Names: Heavenly Bamboo

Description:

An extremely tight and compact version of the species which emerges reddish and retains hints of red in summer, but eventually turns fiery scarlet into fall; no flowers and fruit, but the long-season fall color is overwhelming

Ornamental Features

Fire Power Nandina has attractive bluish-green foliage edged in red which emerges burgundy in spring on a plant with a mounded habit of growth. The pointy bipinnately compound leaves are highly ornamental and turn an outstanding scarlet in the fall, which persists throughout the winter. The brick red stems can be quite attractive.

Landscape Attributes

Fire Power Nandina is a multi-stemmed evergreen shrub with a mounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Suckering

1020 NW Broad St Murfreesboro, TN 37129

Fire Power Nandina is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Fire Power Nandina will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub performs well in both full sun and full shade. However, you may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Fire Power Nandina makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
